Early treatment of palatally erupting maxillary canines by extraction of the primary canines
Sune Ericson and Jüri Kurol 283

Histologic reactions in gingival and alveolar tissues during tooth movement in rabbits
Jan-Paul van de Velde, R. B. Kuiter, Floris C. van Ginkel and B. Prahl-Andersen 296

Five-year treatment results with a headgear-activator combination
R. Lehman, A. Romuli and V. Bakker 309

An experimental investigation into the effect of dimensional change on the stiffness of double vertical incisor alignment loops
I. D. Brown 319

Long-term results of orthodontic treatment. A clinical view 4
H. Brouwer and G. Mazeland 329

A cephalometric unit for research and hospital environments
Beni Solow and Sven Kreiborg 346

The effect of projection errors on angular measurements in cephalometry
J. Ahlqvist, S. Eliasson and U. Welander 353

Can ‘articulare’ be used in the cephalometric analysis of mandibular length?
A methodologic study
Achim Stickel and Hans Pancherz 362

Mandibular growth rotations—their mechanisms and importance
W. J. B. Houston 369

Shear strength of orthodontic bonding agents
N. Pender, E. Dresner, S. Wilson and R. Vowles 374

Improving palatal attachments
P. A. Cook and G. Watts 380
